شركة أسنى للتقنيات المتطورة المحدودة  
ASNA for Advanced Technologies Ltd.

[WWW.ASNA.COM.SA](http://WWW.ASNA.COM.SA)

## Who we are:

ASNA Company for Advanced Technologies Ltd, is a Saudi company renowned producer of industrial chemicals, reseller agent and distributor in field of, laboratory and industrial chemicals, scientific equipment, laboratory furnishings and chemical reactors. It has bagged coveted status of being an authorized agent of renowned international companies. Despite facing stiff competition in the market, ASNA has maintained its strong position and continued to surge ahead of rival companies. ASNA supplies all kinds of lab tools and scientific equipments and helps in installing chemical plants, chemical reactors, and lab equipments. It also trains client's employees on scientific equipments, reactors, and instruments. Apart from these, it also maintains services and supplies spare parts. ASNA also has its own chemical factory (Saudi Industrials Chemicals Factory, SICF) to produce widely used industrial chemicals.

## Our vision:

Aiming to global leadership in advanced technical services, technologies and manufacturing chemicals materials.

## Our mission:

Committed to providing our customers with access to advanced solutions, services, technologies, and chemical products, with high quality, ease, and flexibility.

## Complete solutions for Labs Industrial research and educational Fields

- Nanotechnology
- Oil and Gas
- QC & Material testing
- Water analyses
- Elemental analyses
- Pharmaceuticals
- Soil analyses
- Paint and raions manufacturing
- Geological
- Chemical analyses / manufacturing
- Foods and beverages
- Colleges & Schools
- Vocational Training
- R & D
- Labs furnishing

# ThermoFisher

## SCIENTIFIC

Chemicals, Reagent, fine chemicals

Thermo Scientific instruments, equipment, software, services and consumables address a range of needs from sample, material characterization and chemical analysis to clinical diagnoses and biological-based therapeutics manufacturing.

# BOXUN 博迅

Shanghai Boxun Medical Biological Instrument Co., Ltd. was established in 1996, formerly known as Shanghai Boxun Industrial Co., LTD. For 27 years, the company has focused on temperature, humidity, light environment control and biological sterilization solutions in the life sciences. The company adheres to technological innovation and performance breakthroughs to meet the development needs of different markets and the increasing requirements of laboratory customers for products. So far, the company has formed a sterilization series, culture series, plant culture series, sample drying series, environmental test series, purification safety series as the main six product series. The products are divided into 4 levels: economy; Practical model; Performance model; The flagship model. The company has reached the domestic leading level in manufacturing capacity, research and development strength, technological achievements, product information and other aspects.

**Manufacturing capacity:** The company has two major production bases with a total area of more than 20,000 square meters, and the manufacturing capacity reaches an annual output of 40,000 units/sets.

# **DAIHAN Scientific**

## **General Laboratory Equipment**

DAIHAN Scientific Group is a Laboratory Instrument and Medical Device comprehensive distribution, manufacturing, and total service company that realizes the corporate motto of "Customer-Oriented Total Service ", focusing on its own know-how and solid infrastructure accumulated for 40 years since its establishment in 1980.

DAIHAN is a "Global Hidden Champion" Company that develops and produces premium products with global competitiveness based on advanced control system technology, supplies them to leading domestic research institutes with high quality and reliability, and exports DAIHAN® brands to over 70 countries including Europe, North America, and Japan, etc.. In particular, the world's first IoT-based SmartSystem and full-touch screen system are unique products of DAIHAN Scientific TM Lab that the world is watching closely.

labbox

## General Laboratory Equipment, consumables and glassware.

In March 2006 our first catalogue in Spain was released, with about 10 pages and 200 references of laboratory glassware (beakers, flasks, pipettes, test tubes, etc.) under the umbrella of our three commitments: “always low prices“, “fast delivery” and “satisfaction or refund“.

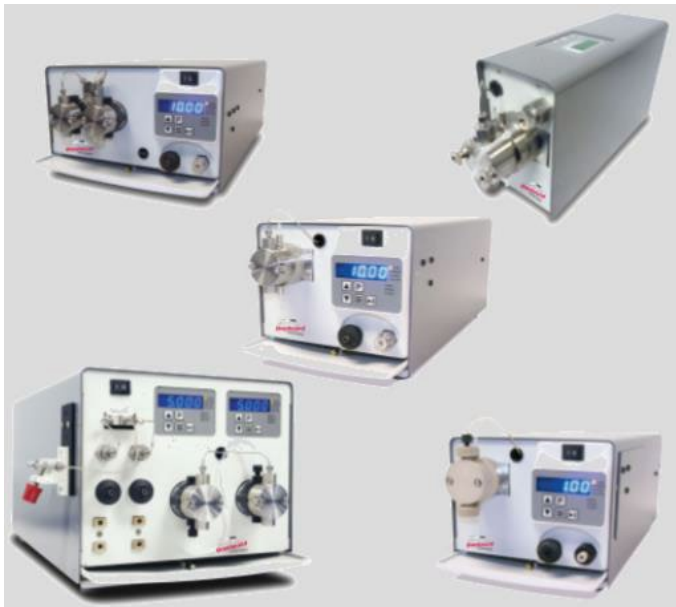

This first catalogue was followed by another, and another, and so we have reached the present day with a reference catalogue in the sector, with more than 5800 references of laboratory materials, consumables, equipment and chemical products, in addition to our own subsidiaries in France, Italy, Germany and the Netherlands, distributors in more than 50 countries, more than 75 employees, several thousand active customers and sales of over 16 million euros.

A CALIBRE SCIENTIFIC COMPANY

## Chromatography consumables

Greyhound Chromatography was established in 1981 and has since been supplying high-quality chromatography consumables to research and analysis laboratories around the world for over 40 years. The company was founded by Greyhound's Managing Director, Paul Massie, and operates from its UK warehouse and office located in Birkenhead, Merseyside.

Greyhound Chromatography is a leading global manufacturer and distributor of high-quality chromatography columns, consumables, certified reference standards and materials, research chemicals, solvents, reagents, and laboratory consumables available today.

## Dynamic temperature control systems Circulating chiller Bath and circulation thermostats

We are a leading supplier of high precision temperature control solutions for research and industry.

Worldwide, our products ensure precise temperature control in laboratories, pilot plants and production processes.

Our product range offers innovative solutions for almost all tasks in the field of liquid temperature control from -125 to +425 °C.

One focus of our product portfolio is the dynamic temperature control systems of the Unistat series.

In addition, we develop and produce circulators as well as classic heating and cooling thermostats.

For numerous applications in the automotive, chemical, pharmaceutical, aerospace, semiconductor and biotechnology industries, we supply customized special equipment, which is realized in close cooperation with our customers.

## Premium Quality Alcohols and Solvents

Kimia has been a UK based specialist supplier of premium quality alcohols and solvents for over 50 years with a reputation both in the UK and Internationally for the highest levels of service and quality.

Today, we are still proudly an independently owned family company, with sustainability and future thinking at the forefront of how we operate.

# Infitek

Founded in 2010, Infitek is a professional manufacturer driven by innovation and service in laboratory and Medical field. our company is certified by ISO9001, ISO13485 and Intellectual Property Management System.

In addition to providing our self-produced products, we also provide customers with purchasing and inspection services in whole China market. We provide fully aftersales service to the products running through us.

We have 18 factories in the form of self-establishment, holding, or equity participation. Each of our facilities have more than 10 years of experienced R & D personnel to ensure the continuous improvement of product quality.

In order to ensure processing accuracy, we use internationally renowned sheet metal processing equipment and CNC machine tools, such as DMG MORI and AMADA.

The whole production process is strictly implemented in accordance with industry standards.

CHISHUN TECH was established in 2005 and specialized in manufacturing sample processing instruments over 20 years. We have over 3000m<sup>2</sup> production space, 40+ patents and exported to 30+ countries.

Our products contains vairous sample processing applications, including planetary ball mill, pulverizer, vacuum glove box, muffle furnace, tube furnace, etc. We aim to our 4P purposes: Provide high-quality products ; Provide comprehensive service ; Provide reliable after-sales ; Put customer needs first.

**MICROLIT**

**MICROLIT design and develop high precision liquid handling instruments for leading laboratories of the world. Our product range includes Bottle Top Dispensers, Electronic Burettes, Micropipettes, Miniature Micropipettes and Electronic Pipette Filling Instruments including accessories like Stands and Tips for Micropipettes. We have nurtured a passion for innovation and precision since 1991. With a trusted network of consumers in 65 countries, we are recognized as a respected and dependable brand in the healthcare and life sciences industry worldwide.**

Professional  
Centrifuge  
Manufacturer

MKE is a manufacturer of centrifuges for laboratories, medical treatment, blood bank, life sciences, research, biotechnology, pharmaceutical, food safety, environment analysis, animal husbandry, and other sectors. The factory is operating under ISO 90001 and ISO 13485 and has passed SGS and Intertek factory inspection. All products have got CE certification and approved as Class II medical devices (IVD), and all the manufacturing stages from the design to the final product are constantly subject to the strictest control.

## Professional electronic balance manufacturer

Creator of weighing system quality

Nanjing Bonita Scientific Instrument Co., Ltd adopts technology of Germany, currently is a partner of BNT instrument. Our company specializes in all types of weighing scales and laboratory equipment research, development, manufacturing and sales. It mainly produces analytical balance, precision balance, density balance, hydrostatics balance, waterproof scale, table scale, counting scale and other laboratory equipment.

LGC Standards is a division of LGC Group, the UK's designated National Measurement Institute for chemical and bioanalytical measurements. We are a leading global manufacturer and service provider of quality assurance and research tools, supporting your analytical needs in more than 170 countries worldwide. We use our expertise to produce to the highest standard, including ranges produced under ISO/IEC 17025 and accredited to ISO 17034. Our wide range of reference materials and proficiency testing schemes is complemented by our experience in outsourcing and customs, enabling us to adapt quickly to providing tailored solutions to meet your analytical needs.
